Projects

E-Krishibhavan
2014-2015

Creating an E-Krishi Bhavan project in PHP involves developing a web-based application that provides agricultural services to farmers. This project could include modules for registration, information dissemination, crop management, pest control, weather forecasts, and market prices.

Hospital Management System
2024

Hospital management system is a software application that helps hospitals and healthcare facilities efficiently manage their operations, staff, patients, and resources. This system typically includes modules for patient registration, appointment scheduling, electronic medical records (EMR).

Courses
